

Advanced Replace® Program

Minimize downtime. Maximize uptime.

When you choose to use the Olympus Advanced Replace program, we'll send you a replacement endoscope that meets Olympus manufacturer specifications and functions at peak performance.

Achieve maximum uptime.

Emergencies are difficult to predict. That's why Olympus has developed the Advanced Replace® Program, so you won't have to reschedule or cancel procedures. When you request a replacement endoscope by 8:00pm EST Monday through Saturday, you'll receive it by 10:00am the next business day.

Olympus parts. Olympus expertise.

Keeping your Olympus endoscope functioning at peak performance is a job for Olympus experts. Our factory-trained technicians ensure that your endoscope is not altered in any way. We're the only service and replacement provider that uses manufacturer-approved parts, materials, and repair protocols – all critical to maintaining the authentic Olympus feel and performance.

Secure your investment.

The most cost-effective way to keep your Olympus endoscopes performing like new is to service them by the manufacturer. We'll fix it right the first time – keeping your repairs to a minimum, maximizing uptime, and increasing productivity. No one does more to protect your investment and secure your bottom line.
