

4K Ultra High Definition Operating Room Integration

ES-IP Integrated OR System

EASYSUITE™ 4K Ultra High Definition System

Modular, Scalable, and Workflow-based Solution

The ES-IP OR integration system is an easy-to-use, future-ready, and enterprise-driven platform that was designed to help physicians focus on what matters most – the patient.

ECONOMIC BENEFITS

- Scalable to support growing customer needs
- Vendor neutral and designed to integrate past, present, and future devices
- Seamless integration with the VaultStream™ server to all major EHR vendors, MIMPS/PACS and VNAs
- Flexible for multiple specialties and types of medical procedures to help improve operational efficiencies

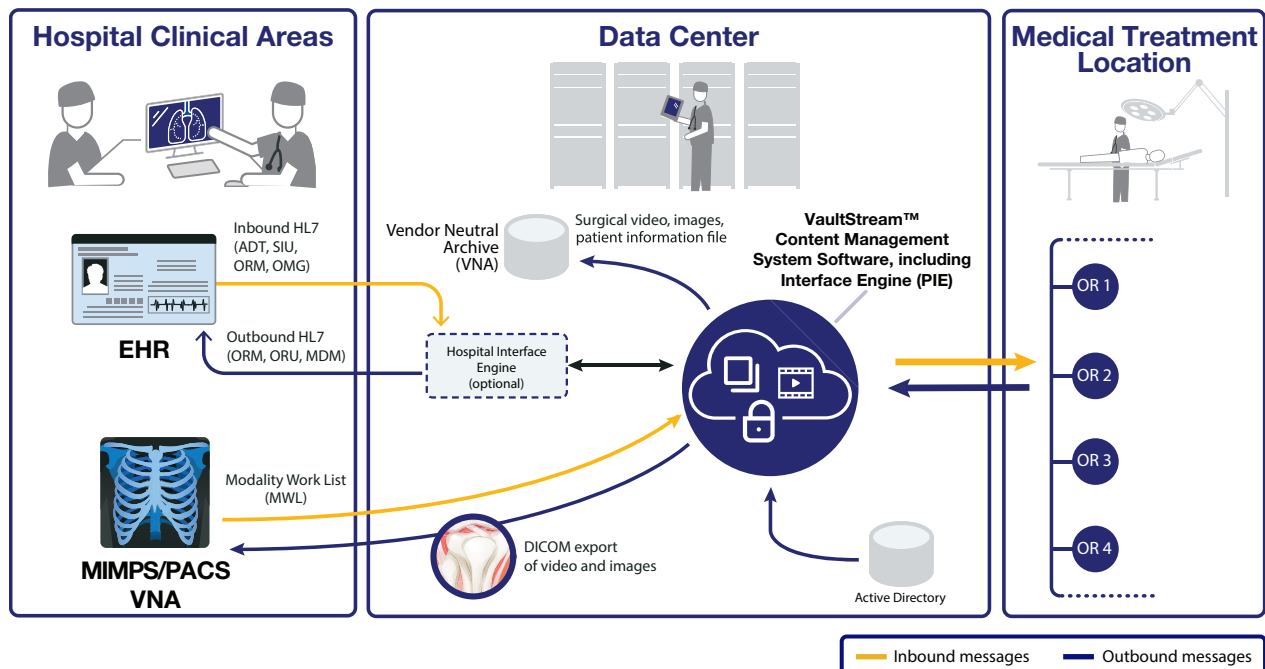

CLINICAL BENEFITS

- Intuitive and easy-to-use touch screen interface follows the natural workflow of surgery
- Supports a unified patient record by integrating with hospital systems
- Interoperability between medical devices enables clinicians to display and capture various visual sources (c-arm, live endoscope, vitals, robot, etc.)

SECURITY BENEFITS

- Windows IoT platform with Automated Software Update Service capability helps keep Windows Defender Antivirus and ransomware protections up to date
- Certificate-based architecture secures connections between devices and rooms—refuses access to unknown devices
- Third-party penetration tested to check for exploitable vulnerabilities in devices and web applications
- Code developed by software engineers trained on OWASP/ASVS and SANS/CWE security standards

Enterprise System Integration Unifies the Patient Record

Videos streamed/captured and images captured by the EASYSUITE ES-IP system and sent to the Electronic Health Record Systems by the VaultStream server software are only intended for documentation of medical surgical procedures and for the exchange of information are NOT to be used for diagnosis or treatment.
